# CLASS WILL

We, the Class of 1961, being of sound mind, do hereby devise and bequeath the following gifts and bequests as our last will and testament.

To the class of 1962 we leave the honor of being the first class to graduate from the beautiful new building we were only permitted to see, not touch.

To the class of 1985 we leave the wonder that their mothers and fathers were able to learn as much as they did under such primitive conditions.

To all the classes which shall follow us, we leave the heritage of a steadily expanding school spirit and pride, the outcome of activities we initiated.

To all of these we leave the knowledge that knowledge is an inexhaustible, if exhausting, resource, and that, although we took all of it that we could carry, we left enough to supply all the probable future needs of those who shall follow us.

## CLASS MOTTO

"Forward ever, backward never."

## CLASS COLORS

Blue and Silver

### WE'RE PROUD OF THEM

We're proud of them because of the fine progress they're making in their new telephone jobs. The young ladies pictured above joined Michigan Bell after graduating from this High School.

This June brings another graduation day when many girls will be starting a new and different life in the business world. We hope it will be with their friends here at Michigan Bell.

going to live better than  ever before ... electrically!

You, today's graduate, are entering an exciting new era where you will live better than any generation has ever lived before—the era of all-electric living.

Your all-electric home for example, thanks to time-saving electric equipment and appliances, will allow you and your family more time to enjoy life together.

Your job will be smoother too. Electricity, in everything from office equipment to heavy machinery, will lighten your work—make it more enjoyable.

If you decide on further education, your field of study may well be related to electricity. Perhaps someday, as a scientist or technician, you will even lend your knowledge to further mold the all-electric world of tomorrow.

But wherever the future finds you, whatever your place in life, electricity will be there to help you live better than ever before—live better electrically.
